

SCOOP!!

Bennett Equipment Sweeps Both World Championships!

HIGHJUMP, BARRELL JUMP, SLALOM
& FREESTYLE, WINNERS ALL.
A PERSONAL THANKS, &
CONGRATULATIONS FROM
MR. BENNETT

BENNETT HIJACKER™ TRUKS

BIG RED RUBBERS T.M.

Mr. Bennett's exclusive trademark of quality, and the heart muscles of the turning system. A high performance blend of pure gum rubber, surgical, and space age resilients engineered specifically for skateboards. Proper cushioning provides firm, precise, pivot geometry for smooth maneuvers as well as tight snap-turns. Designed to be run "snug-up". Say Aloha to high speed "wobs". Available separately — will improve the performance of any truck.

ALLOY STEEL AXLE T.M.

Not just case hardened, but deep heat treated for twice the tensile strength of other truck manufacturers. If you bend this one you're into Evil's trip, or under a truck. (Sorry, Mr. Bennett's elephant can't ride a skateboard.)

GOLDEN NUTS T.M.

In addition to machined axle flats and "D" washers, this assembly is capped off with vibration proof, aircraft locknuts. Quality, fine adjustment, and peace of mind.

TRAC II AXLE T.M.

The Bennett exclusive square beam, wide track yoke spaces your wheels out, precisely where they belong. Positions axle down away from the board for clearance of the biggest of wheels. No riser pads needed for this truck. Watch out for imitators who claim the widest — it may also be the wildest!

FLEX HANGER T.M.

Solid, pressure molded, base plate actually flexes with any board. Guaranteed unbreakable, this "Polysupergoodstuff" unit features integral solid brass threads to receive the action bolt. Tougher than aluminum, cast iron, or pot metal; you'll never strip this one. Color? Racing stripe black! Fits Chicago hole pattern . . . misses all others.

PIVOTUS MARVELOUS T.M.

That's pidgin (Latin) for Mr. Bennett's urethane nose cone bushing. Quiet, cushioned, positive control, Don't get ripped off by metal-to-metal or cheap rubber artists. This pivot may out last other people's trucks. Space age? What else!

PRECISION YOKE T.M.

Heavy, prime aircraft quality, A-356-T-6 magnesium-aluminum alloy yoke. Cast side-by-side with Offenhauser engine components, double drilled, line bored, and machined true and square on both ends for perfect axle alignment. No other truck is as carefully built or guaranteed.

ALLIGATOR T.M. WHEELS

Finally a perfect wheel. Alligators are the biggest, bitin'est, best wheels yet. Super new urethane with a special hi-speed/hi-traction configuration. No-Pop™ race cones guaranteed to stay in for the life of the wheel.

TURBINE BEARINGS T.M.

That's right, turbine! Not sewing machine or roller skates. Ultra-precision aerospace bearings with double seals. Not just closed or shielded — sealed! Pre-loaded with a sophisticated lubricant. Guaranteed not to spin. . . until you jump on 'em. Great for moonlight tubing the neighbors driveways with no hassle. Optional at extra cost.

RECESSED KING PIN T.M.

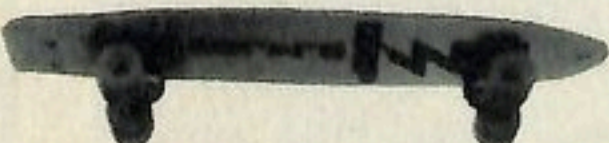

Look at any other truck. From this angle, you'll see their action bolt. What you see is what you drag or bottom out. Not this one!

THE BENNETT HIJACKER IS THE WORLDS ONLY TRUCK ASSEMBLY ENGINEERED SPECIFICALLY FOR HIGH PERFORMANCE, SAFE, FREESTYLE, SLALOM AND DOWNHILL SKATEBOARDING. IT IS NOT WEIRDLY WIDE OR WHACKY AND DOES NOT REQUIRE PADS OR RISERS TO MAKE IT WORK. NO OTHER TRUCK HAS ALL THESE FEATURES OR QUALITY COMPONENTS. COMPARE . . . SEE WHY THE TOP TEAMS, PROS AND HOT AMATEURS ARE ON BENNETT EQUIPMENT: GERRY LOPEZ, "Dynamite" HOBIE ALTER, "Beautifully done" TOM SIMS, "Clean, super responsive . . . and tough" SKITCH HITCHCOCK, "The happening truck" DANNY TRAILER, "Smooth, positive control" PAUL ENGH, "Great feedback, they really pump" HENRY HESTER, "Fast, sensitive, firm" BRUCE LOGAN, "Positive control, dependable" STEVE MONAGHAN, "The best" CHRIS YANDELL, "They're hot" STACY PERALTA, "I got 'em — I love 'em" RUSS HOWELL, "Mr. Bennett . . . the worlds best truck designer".

NOW, ORDER DIRECT - THE WORLD'S FINEST EQUIPMENT

COMPLETED BOARDS
